OUR PHILOSOPHY

Today's world is seeing fast-paced changes. The effects of such social change on the individual and the community include an increase in the difficulty of relying on traditional social support, the lack to transfer cultural values to younger generations, frustration with contemporary lifestyles, and the lack of possibilities for expecting a perfect life. This is a bleak picture, which is exactly why Afghan Hope understands the importance of gaining the skills and leadership abilities that are needed by today's youth and their educators.

Our team strongly believes that education, training, and awareness can make a difference and can inspire us to create a more equitable and sustainable society for the future, by sowing the seeds for an engaged and dynamic younger generation we can cultivate positive change and move closer to our vision of a **better person**, a **better life**, a **better world**.

Community is a keyword in the Afghan Hope philosophy, and we recognize the need for synergistic teamwork at all levels of the community or institution to accomplish the ultimate goal of empowerment for positive growth. Our mission as a service provider is to inspire and motivate productive positive changes in both individuals and organizations, and to shape capable and empowered leaders for tomorrow.

“
If you want a year of prosperity,
grow grain;
If you want ten years of prosperity,
grow trees;
If you want a hundred years of prosperity,
grow people.

- Ancient Chinese Proverb

TRAINING ARRANGEMENT

Afghan Hope Educational Consultancy offers special abroad group training for employees and doctors held in famous universities.

Training presents a prime opportunity to expand the knowledge base of all employees and doctors but currently, many employers and doctors find development opportunities expensive. Employees attending training sessions also miss out on work time which may delay the completion of projects. However, despite these potential drawbacks, training and development provide both the individual and organizations as a whole with benefits that make the cost and time a worthwhile investment. The return on investment from training and development of employees and doctors is really a no-brainer.

Improved employee and doctor performance – the employee and doctors who receive the necessary training are more able to perform in their job. The training will give the employee and doctor a greater understanding of their responsibilities within their role, and in turn, build their confidence. This confidence will enhance their overall performance.

AFGHAN HOPE GERMAN LANGUAGE ACADEMY

Afghan Hope Educational Consultancy offers German language for those students who plan to study abroad especially those who want to study in Germany.
